

Orlie's World

Ferraro Artistry

Coming from an artistically involved family with both parents being fine-artists, there was no doubt in my mind that I would follow the same path. As I studied art at the finest art schools in the country, I majored in Advertising, Art and Marketing, which lead me to a very exciting career, for many years in New York.

At the time I thought this career was all I wanted, but something was definitely missing, and I decided to pursue a new career, which was as an illustrator for several well known entities in New York, and also entering the art publishing poster business, which has kept me busy for the last 10 years. The images I had to create were mostly themes suitable for home decor, and that became very repetitive. I wanted something more daring, something that took my creativity beyond its limits, and the Automotive and Motorcycle Art Murals did just that.

It let me explore part of my imagination into themes that surfaced my innermost fantasies and share my visions with my customers as I depict

these into an image for their bikes or cars.

Realistic airbrushed murals range from a single picture to a full blown theme bike or car and clear coating (bikes only) is an added factor and beauty when dealing with airbrushing. I work exclusively at my studio, where I can give my clients undivided attention, as they expect nothing less when their bike or auto parts are delivered.

I enjoy giving the viewer a sense of depth, and enjoyment and the bike or car a spirit, with an unique identity. All themes are a wonderful experience, and sometimes it saddens me as I have to part with a finished piece

and deliver it to its owner, but I get pictures and letters as these pieces of art win at shows, and that itself is a rewarding experience. If you would like to know more e mail me at
